JOB HUNTER

Client Onboarding Checklist | Complete Setup

To personalise your automated job-search system, please prepare the information and account access below. You do not need to know how to use n8n—we will configure the agreed workflow for you.

1. Your job-search profile

[ ] **Current CV / résumé** — preferably PDF or DOCX; make sure your experience, skills, education, and links are up to date.

[ ] **Target job titles** — list the roles you want (e.g., AI Automation Engineer, Customer Support, Software Developer).

[ ] **Preferred work locations** — remote, hybrid, or onsite; countries or time zones you can work with.

[ ] **Employment preferences** — full-time, part-time, contract, freelance, internship, or other.

[ ] **Seniority and salary range** — entry-level, mid-level, senior, and your preferred salary range if you have one.

[ ] **Skills and portfolio links** — LinkedIn, GitHub, portfolio, certifications, or other relevant links.

[ ] **Example job listings** — send 2–3 examples of jobs you would like the system to find, if available.

2. Accounts and technical setup

[ ] **Telegram** — provide your Telegram username and be available to complete the bot/chat connection test.

[ ] **n8n account or hosting preference** — tell us whether you already have n8n Cloud/self-hosted n8n or need help choosing hosting.

[ ] **AI provider account** — an account with the agreed AI provider (e.g., OpenAI) and billing enabled if required.

[ ] **Job-source preferences** — list the job boards you want; each source must be checked for technical access and compatibility.

[ ] **Document preferences** — share your current CV template or describe the format you prefer.

3. Before setup can begin

[ ] Confirm the agreed job titles, locations, job sources, and workflow scope.

[ ] Confirm who pays for n8n hosting, AI API usage, and any paid third-party services. These are separate from the setup fee unless explicitly agreed.

[ ] Provide access through secure connection methods. **Do not send passwords, API keys, or secret tokens in WhatsApp or this checklist.**

[ ] Make the initial payment and agree on the delivery timeline.

Important: Job Hunter helps discover and assess opportunities and prepare application documents. It does not guarantee employment. Review all AI-generated CVs and cover letters before applying. Applications are not automatically submitted unless that feature is separately agreed and implemented.

Client details

Full name		**Date**	
Preferred contact		**Target start date**	

Setup fee, scope, support period, and third-party costs should be confirmed in writing before work begins.
